## TECHNICAL BULLETIN

# 12-02c

# Raufoss New Line Fittings

The pipe insertion measurement for these fittings are

8mm	20.5mm
10mm	24mm
12mm	25mm
15mm	27mm

To remove the fitting from the port it can be unscrewed with no damage to the pipe.

To remove the pipe from the fitting a fine sleeve is inserted between the pipe and the fitting. This sleeve is held fully into the fitting and the pipe withdrawn. It may be necessary to lubricate the sleeve to ease the insertion and withdrawal.

The sleeve can then be removed from the fitting.
